ENSE 885as

- ▶ UN Goal: Goal 3 Good Health and Well Being
- ▶ github link: <https://github.com/hellyshah27/CovidSupport>
- ▶ Start date: 27th June, 2021 and End date: 2nd June, 2021

INTRODUCTION

- ▶ MVP1 is mainly focussing on the patients side
- ▶ Data gathering from social media
- ▶ Login page for users
- ▶ Patients' registration page
- ▶ Help provider/ NGO's registration page
- ▶ Connect registration page of patients to database
- ▶ Project current status: green

STATUS DESCRIPTION

- ▶ There are the privacy issues of the patients as mentioned in the NDHM which is National Digital Health Mission in India which is made liberal in pandemic
- ▶ Also to verify patients, need their government id proof and also their reports so database should be highly secure

PROJECT ISSUES

- ▶ Added the screenshot of the project below in the following slides which describes the output of the source code

PROJECT DEMO

FIGHT **TOGETHER**

Organization Name:

Address:

- ▶ Add search function in which patients will search with the keyword
- ▶ Add blog post page to have covid related up to date news which can be add by admin

PROJECT CHANGES

- ▶ MVP2: about us page, blog post page, content page of patients and help providers/ NGOs
- ▶ MVP3: add search criteria and also database connection of the above mentioned pages

NEXT UP

Several white lines of varying lengths and slopes are positioned in the bottom right corner of the slide, creating a modern, abstract graphic element.

- ▶ Yes, as the status of the covidsupport is green, I feel my project is on track
- ▶ As connection to the database and almost all the html pages are done it is very good progress about project
- ▶ Privacy concerns for the patients are one of the most important barrier that is current impediment to success in covidsupport
- ▶ Want more database about the NGOs and help provider which are already verified so there is no false connection occurs

REFLECTION

THANK YOU
