

Business case

Name: Helly Nilesh Shah

Community (UN SD goal): Goal 3: Good health and Well being

Date: 17th May, 2021

Proposed Project	CovidSupport
Date Produced	May 17, 2021
Background	The project is focused on the UN goal of good health and wellbeing. It is web-based application that will help covid affected people to find resources that they need in India.
Business Need/ Opportunity	The platform will allow covid patients to connect with appropriate Healthcare providers and NGOs. So they can access the medical supply that they need in timely manner.
Options	This platform will encourage help providers to connect to the covid affected people.

Cost-Benefit Analysis

The only cost related to this project is the amount of time needed to find the right resources for covid affected people and to build the platform. The benefit is higher than the cost as people will find better medical help in this pandemic. When there are shortages of medical supply everywhere.

Recommendation

Recommendation is to provide help as soon as possible without any delay so that people will recover fast and also update information on portal so that time will not be wasted of patients or the help providers.
