- ▶ UN Goal: Goal 3 Good Health and Well Being
- ▶ Ensuring healthy lives and promoting well-being at all ages is essential to sustainable development.
- ▶ Currently, the world is facing a global health crisis unlike any other — COVID-19 is spreading human suffering, destabilizing the global economy and upending the lives of billions of people around the globe.
- ▶ github link: <https://github.com/hellyshah27/CovidSupport>
- ▶ Start date: 3th June, 2021 and End date: 9nd June, 2021

INTRODUCTION

- ▶ Current project status is: green
- ▶ MVP2 is mainly focussing on the content pages
- ▶ Added about us page which mentioned what services CovidSupport provides
- ▶ Blog post page which is having latest covid related news and motivations
- ▶ How patient will be able to submit their emergency need
- ▶ How help providers or NGOs will be able to add their details about what they have for providing help
- ▶ List of help providers/ NGOs
- ▶ List of patients
- ▶ Search criteria has been added

STATUS DESCRIPTION

- ▶ The system will automatically identify after first time registration of the users so that they don't have to mention all time that which type of user they are.
- ▶ There are the privacy issues of the patients as mentioned in the NDHM which is National Digital Health Mission in India which is made liberal in pandemic
- ▶ Also to verify patients, need there government id proof and also their reports so database should be highly secure

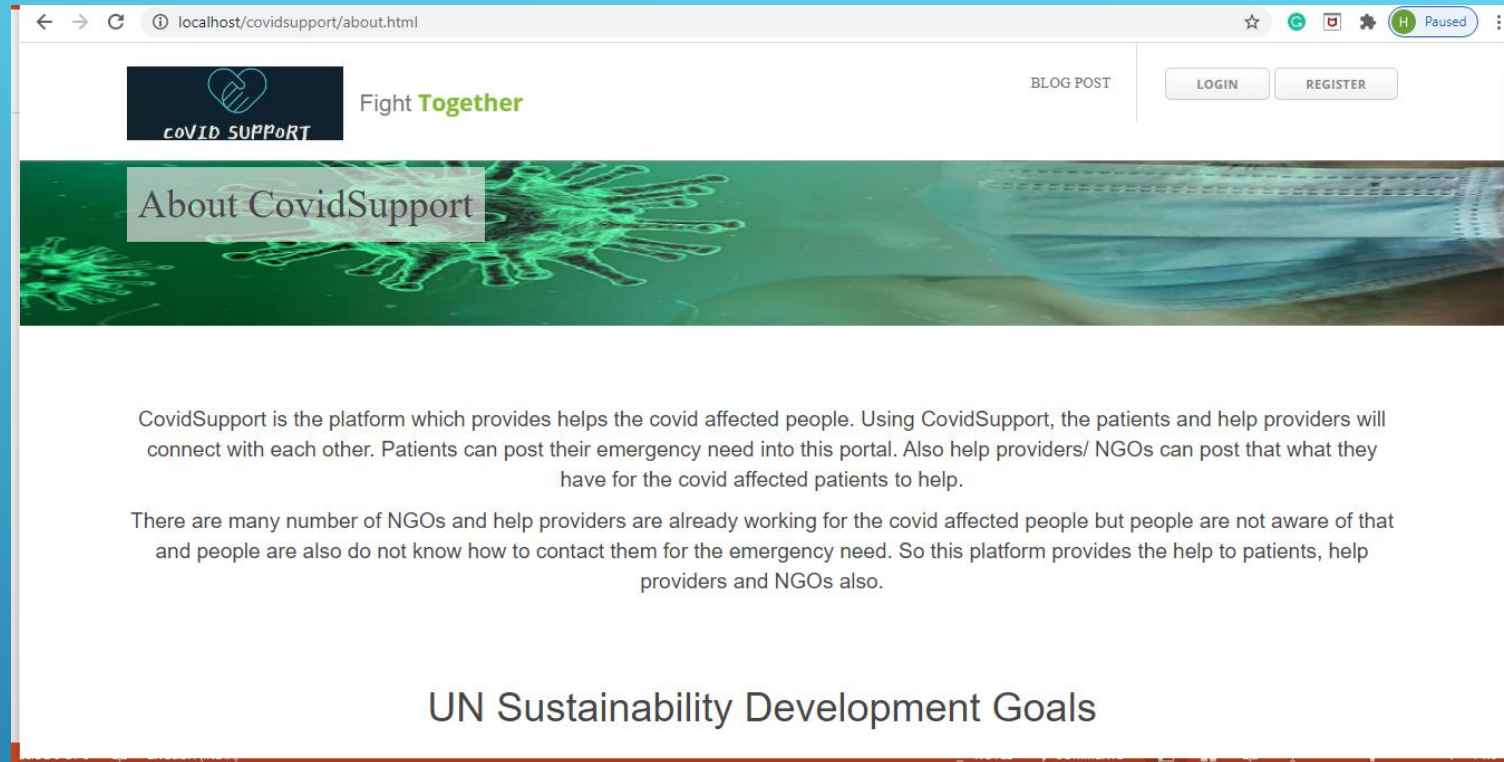

PROJECT ISSUES

- ▶ There is no change has been made in MVP2

PROJECT CHANGES

- ▶ I have added the screenshots of the work that are done in the MVP2 below.

Description

SUBMIT HELP PROVIDERS OR NGO
INFORMATION PAGE

LIST OF PATIENTS PAGE

- ▶ MVP3: database connection of the submit emergency help page, submit more details about NGOs like what they have
- ▶ Fetch all the data from database to providing list of patients and list of NGOs or help providers
- ▶ Connect search criteria with the database so that users will be able to use it with the keywords to search

NEXT UP

- ▶ Yes, as the status of the covidsupport is **green**, I feel my project is on track
- ▶ What I feel good about the project status is already done major part of the project and only connection to database of some pages are left.
- ▶ The most important barrier is how system will automatically know the user type of the CovidSupport.

REFLECTION

THANK YOU
