Patients Name: shaurya walia	Baroda, GJ		

# PATIENTS LIST

- ▶ What I like most about this project is it is for the community, which helps to contribute into the UN sustainability development goals
- ▶ Dislike is **time constraints**
- ▶ Constructing web pages are going well and smoothly during the project
- ▶ Construct web application more user friendly, so that patients will use it easily and faster
- ▶ Design the web application with the consideration of content of digital habitats: findable, discoverable, useful, understandable and meaningful
- ▶ I will divide the tasks into the small chunks as MVPs so that it will ease my work in the future projects

## REFLECTION

THANK YOU
